**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Furukawa et al ( Jp 63-035499).

The Furukawa et al reference teaches a lithium tantalate substrate, note entire reference. The lithium tantalate is placed in a reactor and surround by a powder. The reactor is then heated and cooled. The lithium tantalate has a resistivity of  $10^6$  ohms.cm, note page 544. The heat history of the lithium tantalate would inherently be similar to the instant claims in view of the process and properties being similar.

Claims 3 and 4 are allowable of the instant art of record.
